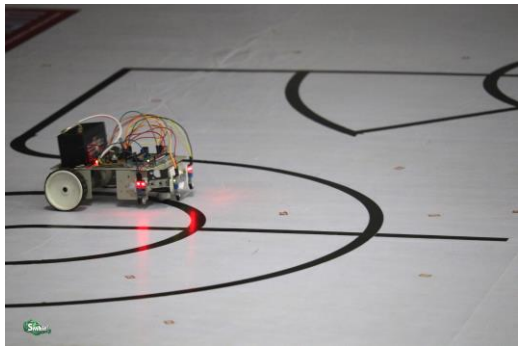
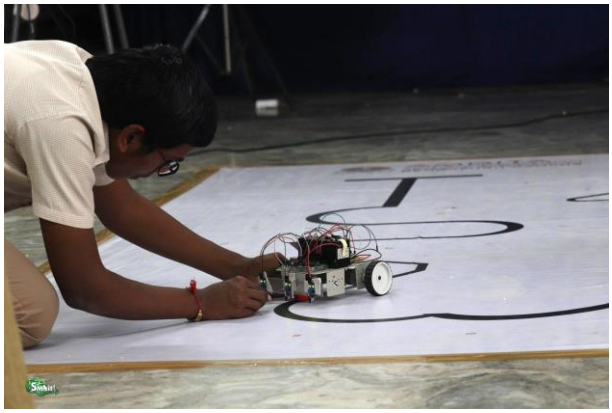
Sentience 2019

The Annual Intra campus Robotics competition, Sentience'19 conducted by ACROM & IEEE-RAS was held on 13th September, 2019 as part of implementing the learning's from 'Hands on Workshop.'





The competition was exciting and the participants had to bring in microcontrolled robots which they built to compete.
There were two events that took place. In the first event Tron, the participants operated their RC bots to complete the path filled with tricky and challenging obstacles. The events winded up with the final race between the qualified RC bots, where they had to face oscillating objects and many such challenging obstacles on their way to glory. All in all, it was a great event and the participants enjoyed it thoroughly.In the second event LIFO, they placed their line following robots on a black track with a white background, and were required follow the path and complete the track. The objective of both the events was to finish the tracks in the least amount of time.
