Title of Talk: "Transforming Healthcare with the Internet of Medical Things"

Abstract:

The Internet of Medical Things (IoMT) has revolutionized healthcare delivery in recent years. IoMT is the network of connected medical devices, wearables, and mobile health applications that enable real-time data collection, analysis, and management. In this keynote talk, we will explore the latest trends, opportunities, and challenges in the IoMT space. We will discuss the impact of IoMT on patient care, medical research, and healthcare operations. We will also examine the regulatory and ethical considerations associated with IoMT and highlight the importance of privacy, security, and interoperability in IoMT ecosystems.
